3M DI-NOC

3M DI-NOC Case Study:
Beverley Racecourse

Project:
Bar renovation

Installer:
Signwright (UK)

Total Project Size:
Bar area and staircase

Project Lead Time: 12 weeks

“In all around 500 panels were produced, all of which required precise and accurate finish to the corners, and nearly 2,000 fixings were used.”

The guys from William Smith did a great job, working with 3M to ensure delivery on time, including arranging a special manufacturing run of our chosen material. They were very supportive in helping us achieve our end result. If it hadn't been for their help in ensuring that the logistics worked, we couldn't have done the job. They really do go the extra mile. It was their exceptional service that helped us to provide a good product,"

Matthew Wright
Managing Director,
Signwright (UK)

BEFORE

STANDARD RE-FITS COST 7 TIMES MORE

Traditional rip-out projects cost 7 times more than wrapping using vinyl. Businesses can potentially refurbish bars, restaurant and kitchen areas for a fraction of the cost. Refurbishments are even more cost effective.

NO LOSS OF REVENUE

Refurbishment can be done with little downtime meaning no wholesale closure or loss of revenue. There's no noise, smell or waste, and most surfaces can be wrapped in situ, meaning less disruption overall.

KEEP UP WITH FAST MOVING TRENDS

Lower costs and faster installs provide the opportunity to refresh interiors more often. Keeping up with new trends maintains interest and can attract new customers. Redesigning bars and restaurants may provide the opportunity to increase revenue too.

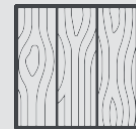

QUICK INSTALL WITH NO BUILDING WORK

Refit without the mess and in a fraction of the time. Vinyls can often be applied over the existing substrate. No need for wholesale disruption.

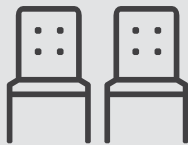

NOT JUST FOR FLAT SURFACES

Its versatile 3D form can fit virtually any surface. Curves and complex shapes no problem. Perfect for ceilings, intricate bar structures and columns.

1500 REALISTIC TEXTURES AND PATTERNS

From concrete to metal and wood to leather; Hyper realistic textures look and feel like the real material. Apply finishes where it may be difficult or too costly to fit the real thing.

TRANSFORM ONE ITEM OR TRANSFORM MANY

Rejuvenate an entire interior in one go or just wrap individual items over time i.e. bar, tables and trims. It's a cost effective solution for any budget.

A SUSTAINABLE SOLUTION

Vinyl offers a longer term solution - reusing and recycling furniture rather than disposing of it. Upcycle existing fixtures and fittings to create less landfill.

FIRE TESTED, MOISTURE AND HEAT RESISTANT

Fire tested, CE marked and IMO approved for peace of mind. Vinyl is also moisture and heat resistant for suitable applications in washrooms and food environments.
