Vinyl With Style

CUBICLE BEFORE

CUBICLE AFTER

“The tenants also wanted minimal disruption, so we could only shut one washroom down at a time, while also having to work alongside other trades who replaced sinks, toilets, lighting, ceilings and flooring.”

“Using 3M DI-NOC allowed us to give our client the concrete effect walls they were after, with minimal disruption to the everyday lives of the tenants, while saving time and money in the process.”

Ben Morris
Managing Director,
Wrapt Limited

3M DI-NOC Case Study:
Office block Refurbishment

Project:
Washrooms situated
over 5 storeys

Installer:
Wrapt Limited, Portsmouth

Cost Saving:
New toilet block estimate:
£40,000

New toilet block using vinyl:
£9,000

3M DI-NOC

BEFORE

AFTER

STANDARD RE-FITS COST 7 TIMES MORE

Traditional rip-out projects cost 7 times more than wrapping using vinyl. Replacing an entire toilet block can be expensive, yet you can wrap cubicles, tiles, walls and furniture for a fraction of the cost. Refurbishments are even more cost effective.

QUICK INSTALL WITH NO BUILDING WORK

Refit without the mess and in a fraction of the time. Vinyls can often be applied over the existing substrate. No need for wholesale disruption.

TRANSFORM ONE ITEM OR TRANSFORM MANY

Rejuvenate an entire interior space in one go or just wrap individual items over time e.g. walls, cubicles, doors and tiles.

NO LOSS OF REVENUE

Refurbishment can be done with little downtime, meaning there is less disruption for any commercial business. There's no noise, smell or waste and most surfaces can even be wrapped in situ.

NOT JUST FOR FLAT SURFACES

Its versatile 3D form can fit virtually any surface. Curves and complex shapes no problem. Perfect for covering tiles, cubicles, walls and any bathroom surface

KEEP UP WITH FAST MOVING TRENDS

Using film can lower costs and allow quicker installs to refresh any washroom environment in offices, spas, retail, hotel, bars, restaurants and more.

1500 REALISTIC TEXTURES AND PATTERNS

From concrete to metal and wood to leather; Hyper realistic textures look and feel like the real material. Apply finishes where it may be difficult or too costly to fit the real thing.

A SUSTAINABLE SOLUTION

Vinyl offers a longer term solution - reusing and recycling furniture rather than disposing of it. Upcycle existing fixtures and fittings to create less landfill.

FIRE TESTED, MOISTURE AND HEAT RESISTANT

Fire tested, CE marked and IMO approved for peace of mind. Vinyl is also moisture and heat resistant for suitable applications in washrooms and food environments.
